

**Association of Earth Science Editors**  
**53<sup>rd</sup> Annual Meeting**  
**Regina, Saskatchewan, September 4 to 7, 2019**

The 53<sup>rd</sup> annual meeting of the Association of Earth Science Editors will be held in Regina, Saskatchewan, Canada, from September 4 to 7, 2019. Although still in the early stages of planning, a meeting hotel has been set up, scouting of possible field trip locations has begun, and a keynote speaker for the closing banquet has been lined up. Meagan Gilbert, a dynamic young woman working toward her PhD in geology at the University of Saskatchewan, will give us a glimpse into what fossils she's unearthed during her studies—and the rocks in which they were found—can tell us about how land-based creatures in southern Saskatchewan adapted to a changing climate during the Cretaceous period.

The meeting hotel is the DoubleTree by Hilton, just steps away from Regina's downtown core. Take the virtual tour — [Virtual Tour](#) — to see what the hotel has to offer, and check out <https://tourismregina.com/> to discover how much there is to see and do in Regina.

A block of rooms (double Queens and single Kings) has been set aside at the DoubleTree for meeting attendees, at a rate of **C\$159.00 per night** for single or double occupancy (an additional C\$15.00 per person is charged for triple or quadruple occupancy). For those wishing to arrive early or stay a little later, this rate will be honoured for 3 days before and after the official start and end of the meeting, subject to guestroom availability. We encourage everyone to book their rooms early, as we have set aside only a small block of rooms, based on past years' attendance statistics. (The hotel is able to offer more rooms beyond the block, at the AESE group rate, provided there is availability.) The hotel will honour reservations received by **August 4, 2019**.

**Hotel contact information:**

DoubleTree by Hilton Regina  
1975 Broad Street  
Regina, SK S4P 1Y2

To book in person, call **306-525-6767** and quote booking code **AES**.

## Getting there

Getting to Regina is pretty simple; one can either fly or drive. **Regina International Airport** (IATA: YQR; <https://www.yqr.ca/>) is serviced by three commercial airlines and is right at the western edge of the city, readily accessible for the short drive into the heart of the city by taxi.

Situated along the **Trans-Canada Highway** (Highway 1 in Saskatchewan), Regina is a 7-hour drive from Calgary, Alberta, to the west; a 5-hour drive from Winnipeg, Manitoba, to the east; and a 90-minute drive from the U.S. border (Raymond and Plentywood, Montana), to the south, along Highway 6.

Wikitravel (<https://wikitravel.org/en/Regina>) is an excellent resource for more in-depth explanations of how to get to the city, and what to do while you're here.

**Meeting registration details** are now on the AESE website, along with the registration form. A **Call for Abstracts** will be circulated later in April.

Keep informed on the progress of planning by checking for updates on AESE's website ([www.aese.org](http://www.aese.org)). For meeting updates as they happen, follow us on these sites:

The annual meeting is open to anyone interested in earth science or science editing and communication. If you have any questions, would like more information, or have an idea for a talk, session or workshop, please contact host chair Heather Brown ([heather.brown4@gov.sk.ca](mailto:heather.brown4@gov.sk.ca)).

We hope you'll join us for what promises to be a great meeting!

## About AESE

The Association of Earth Science Editors is an organization of editors, journal managers and others concerned with publication in the earth sciences. The goals of the organization are to strengthen the profession of earth science editing, and to foster education and improve communication in the earth sciences that will lead to more effective dissemination of earth science information to the scientific community, educators, students, and the public. Our members include editors of North American earth-science journals, editing and publishing personnel with state/provincial and federal geological surveys and with commercial firms, editors of reports prepared for geological consultants, and others interested in earth-science publishing.
